¹ Section 1905 (b) of the Social Security Act specifies the method to be used to compute the Federal medical assistance percentage. From this section the following formula is derived:

N = 3 year average national per capita personal income

S = 3 year average State per capita personal income

Federal medical assistance percentage:

State share = $(S^2 / N^2) \times 45$ or $(45 / N^2) \times S^2$

Federal share = 100 - State share with 50-83 percent limits

² Effective Oct. 1, 1997, through Sept. 30, 1998.

³ Effective Oct. 1, 1998, through Sept. 30, 1999.

⁴ Effective Oct. 1, 1999, through Sept. 30, 2000.

⁵ This is the Title XXI enhanced Federal medical assistance percentage rate specified in Section 2105(b) of the Act. The enhanced Federal medical assistance percentage is limited to no more than 85 percent.

⁶ For 1998, 1999, and 2000, the values in the table were set for State plans under Titles XIX and XXI and for capitation payments and DSH allotments under those titles. For other purposes, the percentage for Alaska is 52.26 and for the District of Columbia 50 percent.

⁷ For purposes of Section 1118 of the Social Security Act, the Federal medical assistance percentage used under Titles I, X, XIV, and XVI, and Part A of Title IV will be 75 percent.
